Tanlac Has Built Him Up So He Is Now Working Hard Every Day.

"When I weighed the other day I found I had gained thirty-five pounds, and that's only a part of what Taniac has done for me," said L. L. Hocks, of North Roswell, Ga., in relating his experience with Taniac.

"I suffered from such an awful case of stomach trouble," he continued, "that I could hardly eat a thing and nothing tasted right. The little I forced down didn't give me any strength and at times I would aimost choke from the gas that formed in my stomach. I was so weak and miserable I just couldn't do any work at all and was just about all in.

"I commenced to take Taniac be-

all in.

"I commenced to take Tanlac because I saw the good it was doing others, and I could feel all the difference in the world right from the start; It simply made me feel like a new man. My troubles are now over, it built me up wonderfully and I am working hard-using pick and shovel every day, and never have any more trouble with my stomach."

would be provided and his fight in America would be gravely compromised. This was the Baturday situation. On Sunday there existed the possibility of a difference of opinion, since both the Frepch and British governments attacked very great value to the proposed prompt action, but on Sunday night the situation was ironed out once more the British and French accepted Mr. Wilson's leadership, the proposed program went into the discard. Here, after all, was a final demonstration of the extent to which both the British and the French are prepared to accept Mr. Wilson's views as the ultimate, accurate expression of America's wishes. By Monday morning all Paris knew that Mr. Wilson had succeptually broken the slate of the peace conference.

The consequences of this dramatic episode are plain. There will be no preliminary peace treaty with Germany before April, and possibly not until May, when the president expects to go back to America. But by the latter date he expectes to have a treaty completed ready to submit to an extraordinary session of the senate, which is untegot to call for June 1.

In the meantime, the work of reviving the league of nations covenant for inclusion in the treaty has actually begun and will be finished with the utmost dispatch by deference to the president's wahes. At the same time, decision will be made in all matters concerning Germany. Austrian: Bulgarian and Turkish matters will be left for the final settlement.

Once the preliminary treaty is signed and sthe league of nations thus greated.

Germany. Austriant Buigarian and Germany. Austriant Buigarian and Turkish matters will be left for the final settlement.

Once the preliminary treaty is signed and the league of nations thus created it is the president sidea that it will deal with all Asiatic and African problems, the question of colonies and mandalories, and such other questions as remain unsettled.

But this bare narration of, facts does not in any sense give the real picture of what has happened. The extraordinary determination of the president to create his league of nations, to include it in the peace treaty, to make good his declaration in his New York speech has, in less than 24 hours with a dramatic suddeness hardly to be described, transformed the whole progress of events in Paris. We have laid aside an Anglo-Fresh-American program for a Wilson program; we have reached this result with little more than a ripple on the surface, however great the subsurface activity for a few hours. British Stick to Plan.

Once more the British have adhered to their rigid primary purpose of preserving Analo-American solidarity, once the Breitish have adhered to their rigid primary purpose of preserving Analo-American solidarity, once more the British have adhered to their rigid primary purpose of preserving Analo-American solidarity, once and the present with the present with the present with the present of the sight, at the suggest of the feather of the ready of the feather of the present with the organization of their easiern frontiers, and they believed it would stitle the question of their easiern frontiers, and they believed it would give them at last a start in the direction of financial reparation.

I do not understand that there is an yet any question that the actual nerms of what was to have been challensed by Mr. Wilson, It may well be that Lloyd George and Clemenceau in the program with the treasient reached and present the proposal to Republican opposition in America. The truth is that the British and the French up to the moment of the pregident's arrival believed that he was in accord with what was being done. Once this was rather any thought on the part of either French or British to make even an indirect proposal to Republican opposition in America. The truth is that the British and the French up to the moment of the pregident's arrival believed that he was in accord with what was being done. Once this was rather surprisingly disclosed to be a mistake, they promptly chained that the results of the change in program. They hope that they expect to be signed by April 7. This irest will contain the covenant to the league of his declaration in his Now York speech.

ment regarding gray hair:

"Anyone can prepare a simple rnixture at home, at very little cost, that will darken gray hair, and make it soft and glossy. To a half pint of water add I ounce of bay rum, a small box of Barbo Compound and & ounce of slycerine. These ingredients can be bought at any drug store at very little cost, or the druggist will put it up for you. Apply to the hair twice a week until the desired shade is obtained. This will make a gray-haired person look twenty years younger. This is not a dye, it does not color the most delicate scalp, is not sticky or greasy and does not rub off."

spread disappointment in Europe. The desire for some sort of preliminary arrangement which should at least make a real beginning in peace conditions and make it promptly was almost incalculable. But if the desire is universal, recognition of the necessity of preserving the good will of Auserica is quite as generally existent; neither Lloyd George nor Clemenceau could afford to take issue over a question in which the president of the United States manifested an inflexible determination to press his own policy. Nor is it wise to conclude that hecause there will be general disappointment if there is a further delay, there will be enduring resentment. On the contrary, the whole episodes flustrates What I have so often attempted to explain in my dispatches; namely the conviction in Europe that at all costs American wishes should be compiled with, second the convicton that the president of the United States speaks the will of America.

Trestige increased.

The truth is that so great was the desire in Europe for a prompt arrangement that not a few doubted the president's course might arouse opposition. When no opposition was realized, it was recognized that Mr. Wilson had resumed the position which he occupied at the outset, that his prestige had been enhanced rather than decreased by the events of his American visit.

Now comes a great question; how long is postponement of the preliminary peace freaty to be expected?
